

Project Phase II

Petri net Modeling

Book Notation Modeling

A: Insert Card

B: Enter PIN

C: Withdraw Money

D: Deposit Money

E: Finish Transaction

Verifying business process using book notation

At the beginning customer visited to the teller machine he or she has to insert the card and submit the PIN number.

After that user has to decide the type of the transaction. That mean select the transaction type.

After select the transaction type user can choose one option between Withdraw money or deposit money.

Then finally user can finish the process.
